

## term

- amine metabolic process
- ATP:ADP antiporter activity
- calcium ion binding
- chitin binding
- cysteine-type peptidase activity
- extracellular matrix structural constituent
- extracellular region
- immune response
- kinesin complex
- microtubule
- microtubule–based process
- mitochondrial ADP transmembrane transport
- mitochondrial ATP transmembrane transport
- primary amine oxidase activity
- protein binding
- pyrimidine nucleobase metabolic process
- pyrimidine nucleoside metabolic process
- quinone binding
- structural constituent of cytoskeleton
- tumor necrosis factor receptor binding
